PROFESSIONAL SUMMARY

Full Stack Developer with enterprise IT experience at Krones (multinational). Delivered an internal app end to end for Krones Australia and led 8 bilingual AI workshops, using the Microsoft ecosystem (Power Platform, Copilot, Power BI). Independently builds and deploys production-style web platforms with .NET 10, Angular, React, SignalR, PostgreSQL and Docker, plus LLM features with fallback handling. Fluent in English.

Available for immediate full-time employment.

PROFESSIONAL EXPERIENCE

Information Technology Intern

Krones (Thailand) Co., Ltd.

December 2025 – September 2026

- **End-to-End Enterprise App Development (Krones Australia):** Delivered a complete internal business application for Krones Australia through a full-cycle process-eliciting business requirements from overseas stakeholders, engineering workflows using Microsoft Power Apps, Power Automate, and SharePoint, deploying to production, and authoring operational documentation for users and support teams.
 - **Application User Training:** Conducted 2 dedicated software training sessions delivered entirely in English (1 session for Thailand operations and 1 regional-scale webinar for international teams) to ensure smooth rollout, clarify system workflows, and drive high user adoption for newly deployed internal applications.
 - **Apply Microsoft Copilot and AI technologies:** to improve the efficiency of internal business processes. Research and propose new AI and technology use cases, providing weekly progress updates to relevant teams.
 - **Enterprise AI Enablement & Bilingual Workshops:** Served as internal AI Lead Instructor, orchestrating 8 bilingual AI adoption workshops.
 - **On-Site Sessions (6x):** Facilitated intensive hands-on Microsoft Copilot and applied AI workshops for local and expatriate staff.
 - **Regional Virtual Webinars (2x):** Led high-impact interactive webinars driving generative AI adoption across business units region-wide.
-

EDUCATION

Ubon Ratchathani University

B.Sc. in Data Science and Software Innovation, 2022 - 2026 (all core coursework completed)

TECHNICAL SKILLS

Backend	.NET 10 / ASP.NET Core, C#, EF Core, SignalR, FastAPI, Node.js
Frontend	React, Next.js, Angular, TypeScript, Tailwind CSS, PWA
Data	PostgreSQL, SQL, Supabase, SQLite, IndexedDB
AI	LLM integration with fallbacks, TensorFlow.js, Microsoft Copilot, Claude
DevOps	Docker, Git, GitHub Actions, Vercel, Cloudflare Workers
Testing	xUnit, Vitest, Pytest
Enterprise	Power Apps, Power Automate, Power BI, SharePoint

PERSONAL PROJECTS

Independent open-source projects, not related to any employer work.

QueueFlow | .NET 10, Angular, SignalR, PostgreSQL

Real-time queue and counter management: customers take digital tickets on mobile and watch live TV boards. Solves unclear waiting status and manual queueing. Built to demonstrate real-time distributed systems.

CodePulse | Angular 22, .NET 10

Paste a public GitHub repo link for an in-browser review of structure, security issues, tech debt and change impact. Speeds up understanding of unfamiliar code. Built to combine real code analysis with optional LLM commentary.

OptiTrack WMS | Next.js, FastAPI, Supabase

Warehouse management system with AI stockout forecasting. Addresses stock shortages and overstock caused by slow inventory visibility. Built as a full stack project with CI/CD.

Cafe Order (QR Easy Order) | React, TypeScript, Supabase

Zero-install QR ordering with a live kitchen display, printable table QR stands and sales reports. Removes manual order-taking for small cafes. Built as a practical product with an automated test suite.

EquipLend | .NET 10 Minimal APIs, React 19, Tailwind

IT asset checkout with waitlist alerts and audit trails. Replaces ad-hoc tracking of who holds which device. Built to show workflow and audit-trail design.

CERTIFICATIONS (KRONES AG)

Responsible Use of Artificial Intelligence (Jun 2026) | M365 Copilot Chat (Jun 2026)
Cyber Security & Data Protection (Mar 2026) | Compliance e-Learning (Mar 2026)

LANGUAGES

Thai (native) | English (fluent)
