PROFESSIONAL SUMMARY

Junior Full Stack Developer with enterprise IT experience at Krones (multinational). Experienced in full-cycle enterprise delivery - strictly adhering to corporate governance by leveraging the Microsoft enterprise ecosystem (Power Platform, Copilot, Power BI) for internal app development, regional application support, and bilingual user training. For independent engineering, continuously builds and deploys modern production-grade web apps using React, Next.js, Node.js, .NET, TypeScript, PostgreSQL, Supabase, and Docker. Fluent in English.
Available for immediate full-time employment.

PROFESSIONAL EXPERIENCE

Information Technology Intern

Krones (Thailand) Co., Ltd.

December 2025 – Present

- **End-to-End Enterprise App Development (Krones Australia):** Delivered a complete internal business application for Krones Australia through a full-cycle process-eliciting business requirements from overseas stakeholders, engineering workflows using Microsoft Power Apps, Power Automate, and SharePoint, deploying to production, and authoring operational documentation for users and support teams.
 - **Application User Training:** Conducted 2 dedicated software training sessions delivered entirely in English (1 session for Thailand operations and 1 regional-scale webinar for international teams) to ensure smooth rollout, clarify system workflows, and drive high user adoption for newly deployed internal applications.
 - **Apply Microsoft Copilot and AI technologies:** to improve the efficiency of internal business processes Research and propose new AI and technology use cases, providing weekly progress updates to relevant teams.
 - **Enterprise AI Enablement & Bilingual Workshops:** Served as internal AI Lead Instructor, orchestrating 8 bilingual AI adoption workshops.
 - **On-Site Sessions (6x):** Facilitated intensive hands-on Microsoft Copilot and applied AI workshops for local and expatriate staff.
 - **Regional Virtual Webinars (2x):** Led high-impact interactive webinars driving generative AI adoption across business units region-wide.
